Powell Smith and Furmston's building contract casebook: the interaction between general principles and the provisions of the standard building and construction contracts is a central feature of construction law. The major part of the law is laid down in decided cases and construction professionals should be familiar with these cases, but the information is scattered throughout a large number of law reports. The fifth edition of Powell Smith and Furmston's building contract casebook is designed to help construction professionals become familiar with those key cases. It brings together a wide range of cases on the main aspects of the law of construction contracts, states the principle established by each case and gives a summary of the facts and the decision for the majority of cases. Verbatim extracts from the judgment are included. The casebook presents the leading cases on each topic together with many lesser-known but important decisions. A number of useful decisions from the Commonwealth are also included throughout. The author's approach is practical rather than academic.

The JCT standard forms of building contract require a thorough understanding of their procedural requirements as well as their legal implications. They require both the contractor and the architect on behalf of the employer to send a wide range of notices and letters if each party is to protect its legitimate interests. The main contract forms are also supported by complex sub-contract documentation. Therefore, it is not surprising that when this book of specimen letters, notices and forms was first published, it was widely welcomed by the construction industry. The book provides examples of documentation likely to be required for a contract under the following JCT forms: the standard form of building contract, the intermediate form of building contract, the agreement for minor building works, the standard form of building contract with contractor's design. It includes a commentary on the practical implications of the various documents and highlights the points to be watched. The new edition takes into account the wide range of amendments to the latest editions of the standard forms following the Housing Grants, Construction and Regeneration Act 1996 and, in particular, the new payment and adjudication provisions for the first time. It features documentation for use with the JCT Design and Build form.
